GREENKEEPER TOOL

The Greenkeeper Pro by Pitchfix is a one of a kind divot- and brown spot repair tool. The tool is build around Pitchfix' award winning RepairTec technology and was designed to make your maintenance teams life easier. With just one push down in a ball mark, while retracting, the pins and spring mechanism stretch the root and soil structure back in place like the ball mark was never there. Simultaniously the ball marks spot is aerated by the pins allowing for a quicker healing of the affected area.

The Greenkeeper Pro comes as a set with two different heads for dry & firm as well as for wet & soft conditions. Always have the best repair tool for common circumstances.
